

Ahmet Karaca

ahmettarikkaraca@icloud.com — (647) 444-6021 — github.com/Codeefficiency

SUMMARY

Software Engineering student with hands-on development experience. Full-stack developer with experience in fintech and AI integration, skilled in React Native and Firebase, delivering secure, scalable apps for real-time financial insights. Proficient in JavaScript/TypeScript, Java, and SQL, with practical knowledge of Node.js, React, and C++. Adept at collaborating in agile teams, and maintaining code quality with Git and CI/CD pipelines.

EDUCATION

York University, Toronto, ON

Expected 2027

B.Eng in Software Engineering, Big Data Stream — 3rd Year

Relevant Coursework: Data Structures & Algorithms, Advanced OOP, Operating Systems, Computer Architecture, Software Design Patterns, Linear Algebra

EXPERIENCE

Vexo Labs – Full Stack Developer

Apr 2025 – Present

- Translated **Figma UI/UX designs** into fully functional, responsive pages, ensuring consistent design fidelity and smooth user experience.
- Built and maintained features for a **React Native + Node.js** financial app supporting multi-budget tracking and transaction processing.
- Designed and documented **RESTful APIs**, integrating secure authentication, webhook handling, and data synchronization.
- Conducted debugging and performance optimization, reducing latency and improving system stability.
- Wrote clear documentation and collaborated with teammates through Git branching/merging workflows.
- Migrated backend logic from client-side to server to improve scalability and maintainability.

TECHNICAL SKILLS

Languages

JavaScript, TypeScript, Python, Java, C, HTML/CSS

Frameworks/Tools

React Native, Node.js, Express, Tailwind, Expo, Git, Postman

Cloud/Databases

Firebase (Auth, Firestore, Hosting, Functions), Django

APIs

Plaid API, OpenAI API, REST APIs
